

*Amendments*

In accordance with 37 CFR §1.121, please amend the above-identified application as set forth below.

*Amendments to the Specification*

Please amend the specification by inserting the replacement paragraph below at the last paragraph on page 5:

Figure 4 is a bottom view of the flexible pressure plate, 10, installed on a push paddle, 32. The visible underside of push paddle, 32, depicts a series of ridges molded or stamped into the paddle to add rigidity to the portion of the paddle that slides in and out of channel, 29, in housing, 30. These ridges taper a flat surface at pressure surface end, 33. The ridges also engage guide bosses 27 that define the channel, 29, within housing, 30.
